

סמינר - מרצה אורח

Ms. Judith Kupferman

from the Physics Department

Title:

Practical quantum communication

In this talk I will explain the basic principles of quantum communication and what is it good for.

In the context of the new RFI from Mafat, I will also survey the world state-of-the-art in the academia and industry.

I will give examples of practical devices already available for use, and present day large scale projects around the world.
