

# The Marine System of the Red Sea II

A joint undergraduate course for 16 Israeli and 8 Canadian students (in English)

**Dates: 20-29, December 2015**

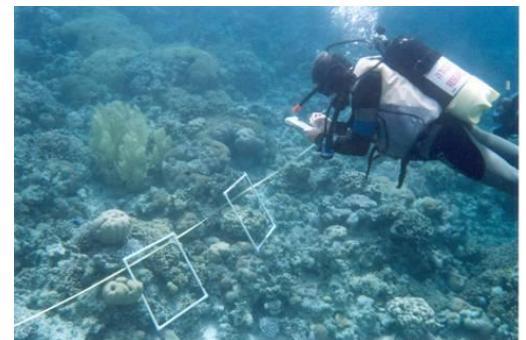

**Place: The Interuniversity Inst. Marine Sciences, Eilat**

**Level: Undergraduate students, last year, sciences**

**Coordinators: Prof. Amatzia Genin & Dr. Roi Holzman**

## Course description:

The course will provide an understanding of biological, physical, and chemical oceanography, marine ecology, coral reef ecosystem, marine microbiology,

reef fishes, and biomechanics. The course will combine lectures, laboratories, practical exercises and research projects. Grading will be based on a final exam (50%), a project report (40%) and an individual evaluation (10%).

The interdisciplinary course is open to **undergraduate** students in their last year of study for the degree in all disciplines of natural sciences.
